

# AFPC e-Resource for Healthcare Students and Faculty

## New e-Learning Platform Overview

**e-Learning for Healthcare Professionals**

Interprofessional Modules ▶ Informatics for Pharmacy Students ▶

Developed by AFPC  
Funded by Canada Health Inforoute  
In collaboration with AFMC & CASN

 Association of Faculties of Pharmacy of Canada  
 Association des facultés de pharmacie du Canada

 Canada Health Inforoute  
 Inforoute Santé du Canada

 CASN ACESI

 AFMC

AFPC and Canada Health Inforoute have created a national, competency-based, e-resource called e-Learning for Health Care Professionals. This unique program is aimed at improving graduates' preparedness for work in technology-enabled environments, by integrating digital health into curricula at a pan-Canadian level.

AFPC's new open-access Moodle e-learning platform features the Informatics for Pharmacy Students e-Resource (Version 3 - 18 chapters) and two new emerging and relevant interprofessional modules for use in medicine, nursing and pharmacy entry-to-practice level education (e-Medication Reconciliation and e-Prescribing).

  -  Fraser Health: Health Record Policy
-  Section 5: Formats, Style and Templates
  -  Poll A: Documentation Format in University Program
  -  Poll B: Documentation Format in Training Site
  -  Virtual Patient: Document for Terry

## Interprofessional Education Chapters

In partnership with the Association of Faculties of Medicine of Canada and the Canadian Association of Schools of Nursing, two interprofessional modules are now available: e-Medication Reconciliation and e-Prescribing. The e-prescribing chapter is consistent with the development of PrescribeIT™, Inforoute's new national service.

 Intentional Discrepancy

  
 Unintentional Discrepancy

**Section 3: PrescribeIT™: A National Solution**

7. Core Service Features

Create Rx	The prescriber creates a net new prescription
Renew Rx Request	When a prescription runs out of refills, the pharmacist can send a renewal request to the prescriber and if approved, the prescriber sends back a new prescription
Rx Status	The prescriber will be able to see if their prescription has been dispensed or the dispense has been cancelled
Public Drug Formulary	Prescribers will have integrated access to public drug formularies to ensure drug coverage in advance of prescribing
Clinical Communication	Secure messaging functionality between prescribers and pharmacies supports improved collaboration
