The Association of Faculties of Pharmacy of Canada (AFPC) and Canada Health Infoway partnered as part of the Clinicians-in-Training project to better prepare pharmacy students to practice in modern, technology-enabled environments. Educators, informatics experts, and students were engaged to develop a national, online, competency based, educational resource. Faculty members are invited to access the e-Resource, and participate in its implementation and evaluation.

Informatics for Pharmacy Students e- Resource

Available at http://afpc-education.info

"Informatics for Pharmacy Students" is an e-Resource designed to be used by faculty members within their respective courses. It may be completed by students in sections or in its entirety. Written by a collective of Canadian pharmacy faculty members and clinicians, with upper year students actively involved in each stage of development, the program will engage pharmacy students in a comprehensive foundational treatment of this area, using media-rich material with innovative learning activities, including virtual patients, polls, and self-assessment quizzes.

Domains *(and example topics)* available in the first release of the program include:

1. **Concepts and Context in Pharmacy Informatics** *(Pharmacist's Role & Informatics, Patient Records, e-Health, Trends and Influences)*
2. **Information Management & Technology** (*Information in Healthcare, Computational Thinking, , Pharmacy Practice Management Systems)*
3. **Knowledge Management & Technology** (*Electronic Resources, Documentation, Automation, CPOE & e-Prescribing)*
4. **Privacy, Security & Confidentiality** *(Legal, Ethical & Regulatory Frameworks: Theory and Application)*
5. **Consumer Health Informatics** *(Health Literacy, Social Media, Self Care)*
